14. (A review of the performance of the company and its principal subsidiaries, setting out material factors affecting the earnings and/or revenue of the company and the group for the current quarter and financial year-to-date)

The Group recorded revenue of RM201.7 million and profit before tax of RM23.4 million respectively for the quarter. For the financial year-to-date under review, the Group recorded a revenue of RM613.9 million and profit before tax of RM89.3 million respectively.

Average fare has decreased from RM156 to RM123 during the quarter under review. As a result, compared to the immediately preceding quarter, revenue has decreased by 11% whereas load factor has improved by 4%. These reductions were expected as the preceding quarter is historically the Group's strongest. Nonetheless, the results for the current quarter are within expectation in view of the low demand, competitive pressures and our aggressive promotional fares that caused lower yield compared to the preceding quarter.

15. (An explanatory comment on any material change in the profit before taxation for the quarter reported on as compared with the immediate preceding quarter)

The Group achieved a profit before tax of RM23.4 million for the quarter under review. This was a decrease of RM30.5 million compared to that of the immediately preceding quarter ended 31 December 2005. The decrease in profit was mainly due to lower average fares arising from our aggressive promotions, competitive pressures and heavy maintenance checks due to the induction of the last batch of Boeing 737 aircraft. Historically, the immediate preceding quarter is a strong quarter due to peak travel season.

Included in the Group's result was RM1.9 million, being the 49% share of profits contributed by Thai AirAsia, a jointly-controlled entity. This is a decrease of RM3.0 million compared to the preceding quarter ended 31 December 2005 and was mainly due to unrealized losses in foreign exchange. Losses in the Group's associated company, Indonesia AirAsia, which are funded by the Group and are not included in the Group's results under the existing accounting policy, increased to RM8.8 million in the current quarter compared to RM2.1 million in the preceding quarter and amount to RM13.9 million for the financial year-to-date.

16. (A commentary on the prospects, including the factors that are likely to influence the company's prospects for the remaining period to the end of the financial year or the next financial year if the reporting period is the last quarter)

The Group is facing a number of challenges including increased competitive pressures, lower yields due to our aggressive promotional fares and the unpredictability of fuel prices.

The high cost of jet fuel remains a concern. The Board does not anticipate fuel prices falling significantly and is of the view that they will remain at high levels in the short term. The Company has hedged 100% of its fuel volume requirement for the financial year ending 30 June 2006. Of the total volume, 75% of the requirement was hedged based on WTI crude oil within the pricing band of USD40 to USD52 per barrel. The pricing band for the remaining 25% is between USD48 and USD60 per barrel.

The Directors remain positive on the long term business outlook of the Group that is geared for growth.

Diluted earnings per share

For the diluted earnings per share calculation, the weighted average number of ordinary shares in issue is adjusted to assume conversion of all dilutive potential ordinary shares. The Group's dilutive potential ordinary shares are in respect of options over shares granted to employees.

In respect of options over shares granted to employees, a calculation is done to determine the number of ordinary shares that could have been acquired at fair value (determined as the average share price of the Company's shares) based on the monetary value of the subscription rights attached to outstanding options over shares. The number of ordinary shares calculated is compared with the number of shares that would have been issued assuming the exercise of the options over shares. The difference is added to the denominator as an issue of ordinary shares for no consideration. This calculation serves to determine the "bonus" element in the ordinary shares outstanding for the purpose of computing the dilution. No adjustment is made to net profit for the period for the options over shares calculation.
